## FLOATATION THERAPY

Floating is commonly referred to as Floatation Therapy or Sensory Deprivation.

It involves lying in a pod that contains 500kg of pure magnesium sulphate which creates the buoyancy for you to float effortlessly & escape the forces of gravity.

The water is heated to skin temperature so after a while the sensation of your body dissolves & you feel weightless. The pod is both sound & light proof which gives your brain the chance to disconnect from the constant bombardment of sensory input & enhance your ability to be cognitive, mindful & introspective.

The magnesium sulphate solution leaves you feeling deeply relaxed & vibrant as the tension in your body melts away & your body releases amazing energy. There is simply no other technology or environment that can stimulate these evolutionary effects.

Float therapy is a powerful tool for wellness, relaxation, pain relief & better sleep. As with any therapy, with regular use its benefits are enhanced. Float therapy offers relief & benefits which are cumulative— they build on themselves with each subsequent session. Your body & mind actually learn how to relax into the float with each session.

## IPL PERMANENT HAIR REDUCTION

### How does Ultra Essence's program e>o compare to other hair removal methods?

With program e>o we can treat large areas of the body much quicker & without the pain associated with waxing & electrolysis. Waxing can be painful & the hair must be a certain length to be effective, skin reactions & ingrown hairs are common. Program e>o is faster more convenient & reduces ingrown hair & skin reactions.

### How many treatments will I need & what results can I expect?

We recommend a course of 8-12 treatments initially & thereafter you may wish to have one or two top up treatments per year. Hair remaining will become lighter, finer & more vellus like.

### Who can be treated?

The treatment works with the melanin in the hair. Conversely white hair, grey hair, red hair (pheo-melanin) cannot be treated. Blonde hair is more challenging than dark hair but if there is melanin in the hair & the root is dark it can be treated.

### How does the treatment work?

The IPL is applied to the skin & light energy passes through the applicator & is absorbed by the hair causing a heat reaction & destroying the follicle.
